

DockFix

A better Dock than the one your Mac came with.

DockFix replaces the macOS Dock with one you control completely. It is as fast and as polished as Apple's, customized however you like, and it does the things Apple never added: widgets, window previews, custom icons for any app, and themes shared by the community. Version 5.0 is a complete rewrite of the app.

THE APP

Name	DockFix
Developer	AppVerge, Denmark. Founded and run by Gustav Lübker.
Current version	5.0, a full rewrite of the app
Platform	macOS 14 or later, on Apple silicon and Intel. Signed and notarised.
Price	€14.99, paid once. No subscription, no feature gates, every update included.
Trial	Seven days free, no card required.

WHAT IT DOES

True liquid glass	Light bends through the dock and around its edges, rather than simply blurring what sits behind it.
Widgets	A full widgets system living in the dock itself: media playback, the clock, shortcuts and more.
Window previews	Hover an app to see its open windows, live, and jump straight to the one you want.
Custom app icons	Apply your own artwork to any app, including the native ones macOS will not otherwise let you touch.
Themes and presets	Colours, opacity, size, position and animations, or one click to apply a theme from the community store.
Performance	Under 1% CPU usage on average.

IN THIS KIT

App Icon	The DockFix application icon at 1024 px.
Banners	A 4K promotional banner and a 1200×630 social cover.
Feature Photos	Four product images, rendered from the DockFix website at 2073×1089.
